

SCREENSHOTS

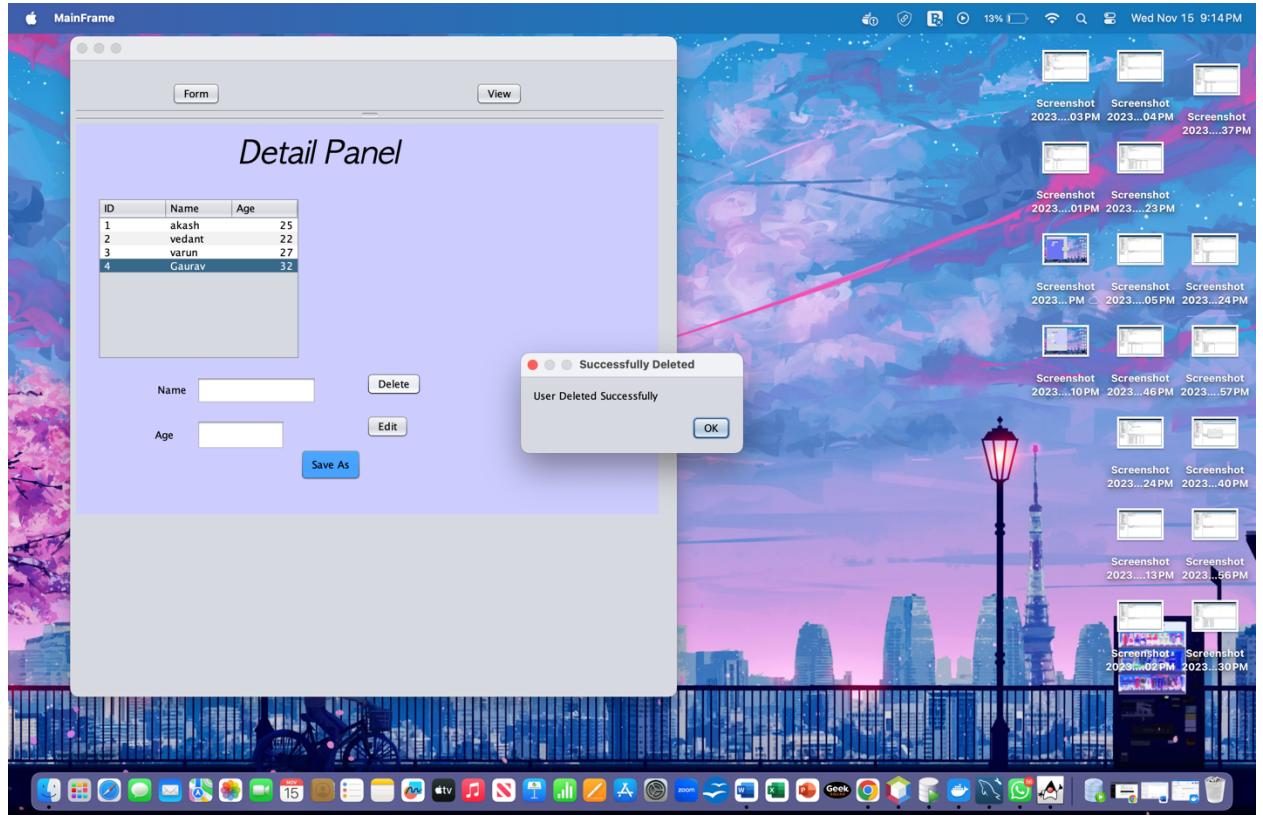

1. User registration:

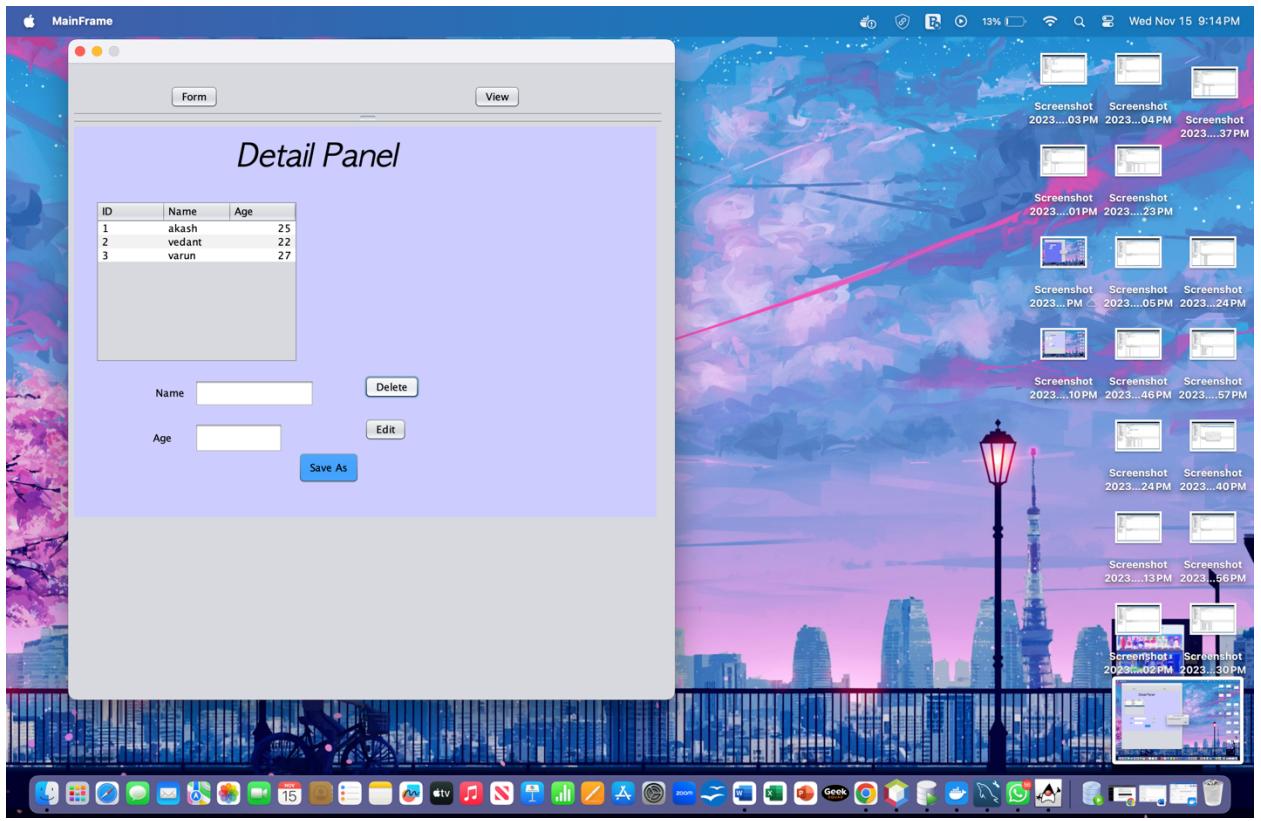

2. View panel :

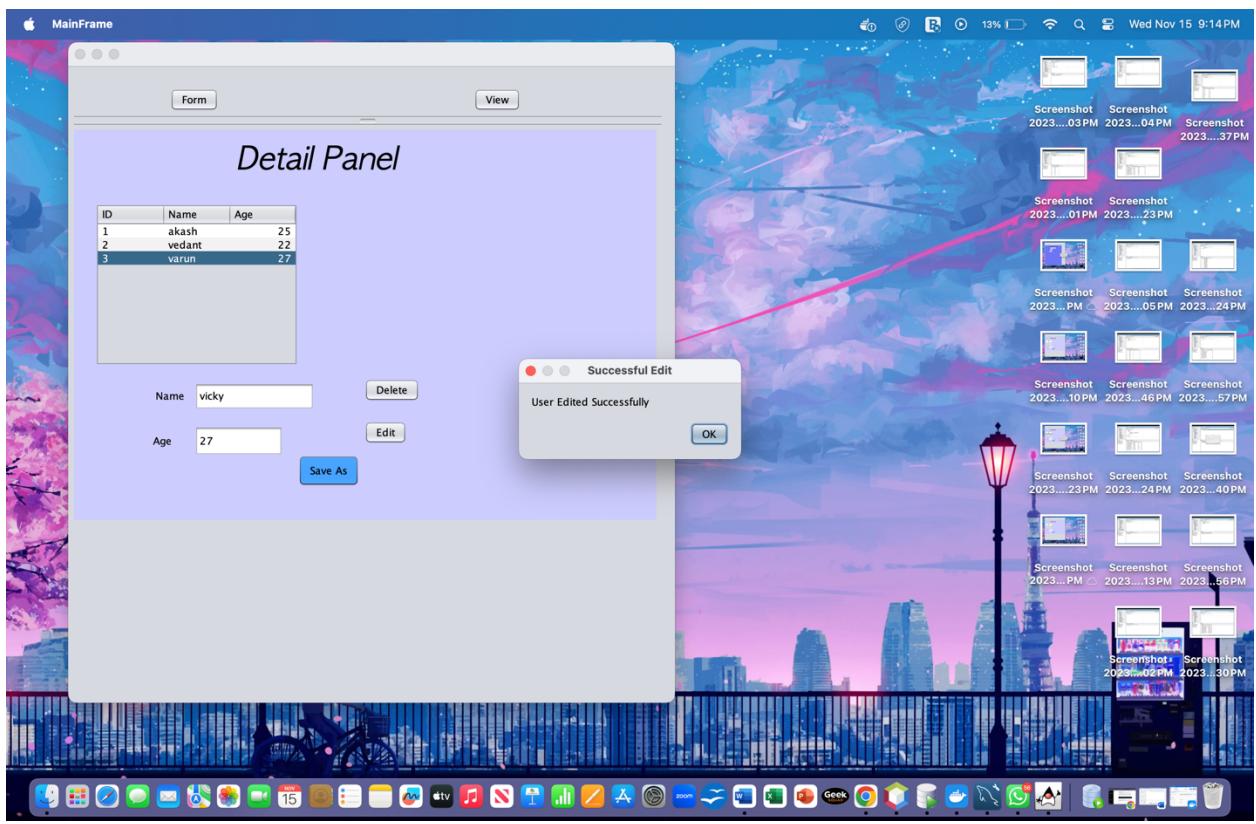

3. Delete

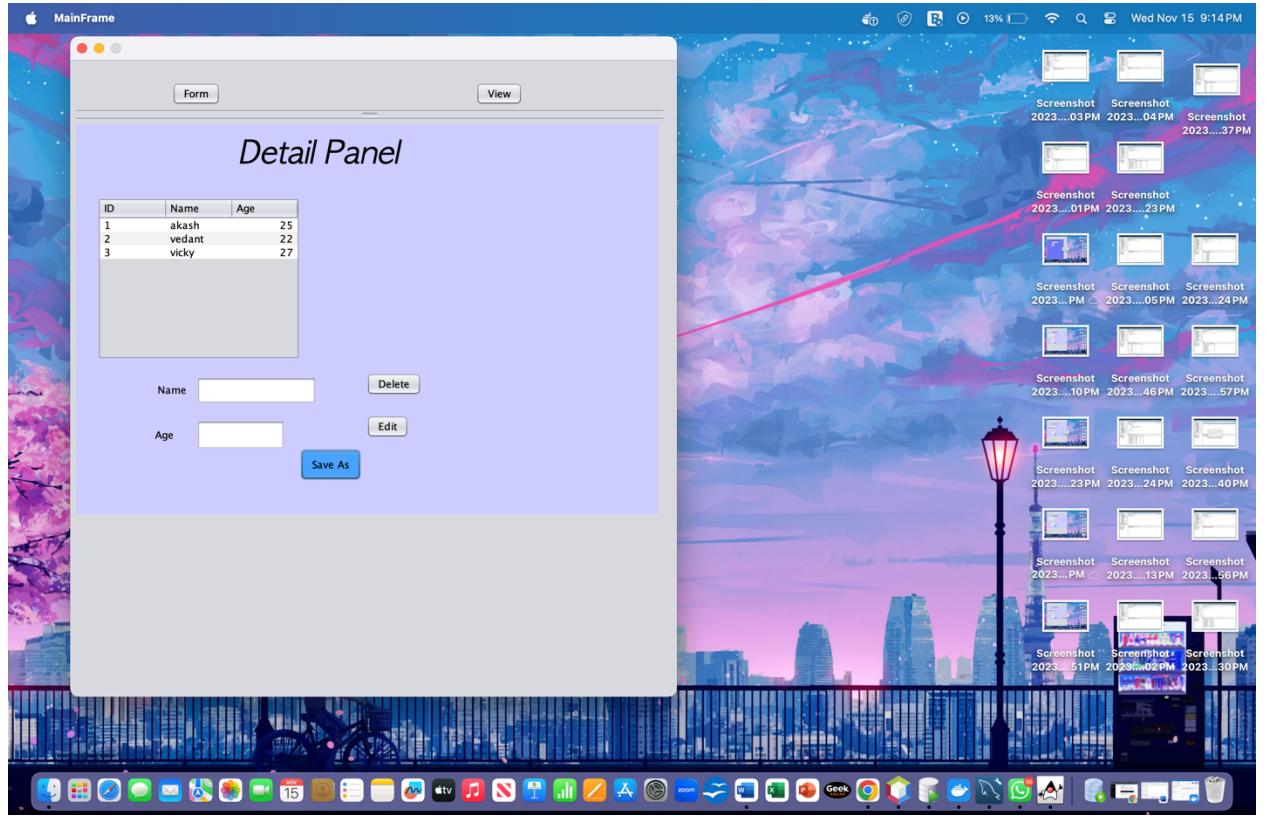

4. User deleted view panel:

5. Update:

6. Updated view panel:

7. MySQL workbench:

The screenshot shows the MySQL Workbench interface. On the left, the 'Schemas' tree view displays a 'server' schema with 'Tables' (Patient, User), 'Columns' (Id, Name, Age), and other database objects like Views, Stored Procedures, Functions, and SYS. The 'Object Info' tab is selected. The main area contains a 'Query 1' window with the following SQL code:

```
1
2 • use server;
3 • select * from User;
```

The 'Result Grid' shows the results of the 'select * from User' query:

Id	Name	Age
1	akash	25
2	vedant	22
3	vicky	27
NULL	NULL	NULL

The 'Action Output' section at the bottom lists the following activity:

Action	Time	Response	Duration / Fetch Time
select * from User LIMIT 0, 1000	20:57:57	1 row(s) returned	0.012 sec / 0.000001...
use server	21:10:00	0 row(s) affected	0.0027 sec
select * from User LIMIT 0, 1000	21:10:00	2 row(s) returned	0.0022 sec / 0.000001...
use server	21:15:13	0 row(s) affected	0.0086 sec
select * from User LIMIT 0, 1000	21:15:13	3 row(s) returned	0.0031 sec / 0.000001...

A message in the top right corner states: "Automatic context help is disabled. Use the toolbar to manually get help for the current caret position or to toggle automatic help."
